Extended version

iGrafx, with its genesis in 1987, is a leading provider of Business Process Analysis (BPA) solutions for flexibly designing, optimizing and implementing more productive processes across the enterprise. iGrafx effectively links the three major process constituencies: IT, Business Analysis and Process Initiatives for measurable productivity improvements.

iGrafx offers the most comprehensive BPA solution that help companies increase the return on investment (ROI) of their business process improvement initiatives by reducing the costs of those initiatives through product value, ease of wide deployment, seamless product upgrade capability, a central repository for sharing and communicating process knowledge, and a strategic modeling tool to identify, understand and minimize risk. iGrafx precisely meets the needs of the major process constituencies, while at the same time ensuring a high level of communication and collaboration across the groups.

iGrafx focuses on delivering the most comprehensive yet easy to use tools for individuals and organizations who take a process-centric approach to becoming and remaining world class competitors.
